

Stephen A. Lewandowski, PhD, MS, CPH

Environmental health scientist | Environmental Science and Engineering Officer | Force health protection and safety leader | University educator | Applied researcher

Professional Summary

PhD-trained environmental health scientist and university educator with more than 20 years of applied experience in military public health, environmental and occupational health, force health protection, safety, environmental compliance, research, and program leadership. Current work in the Republic of Korea integrates theater-level force health protection with brigade safety and occupational-health oversight.

Education

2022

PhD, Environmental Health Sciences

Columbia University Mailman School of Public Health

Dissertation: Observed Impacts of Environmental Conditions on Heat Illness Morbidity in the Military

2019

Master of Philosophy, Environmental Health Sciences

Columbia University Mailman School of Public Health

2011

Master of Science, Environmental Health

Harvard T.H. Chan School of Public Health

Exposure, Epidemiology, and Risk concentration

2002

Bachelor of Science, Environmental Science

United States Military Academy

Environmental Engineering track

Professional Experience

2023-present

Environmental Science and Engineering Officer / Force Health Protection Officer / Brigade Safety Officer

65th Medical Brigade - Republic of Korea

- Provides theater-level force health protection support for more than 63,000 beneficiaries.
- Leads safety and occupational-health oversight for more than 1,200 personnel across six direct-reporting units.
- Develops preventive-medicine guidance addressing environmental and operational health risks.

2014-2017

Deputy Director, Public Health Operations / Medical Brigade Environmental Science and Engineering Officer

62nd Medical Brigade - Joint Base Lewis-McChord, Washington

- Led preventive-medicine planning, environmental compliance, clinical-operations support, readiness coordination, exercises, staff development, and international disaster-response engagement.

2007-2009

Executive support and startup program management

Office of the Surgeon General and Comprehensive Soldier Fitness Directorate - Washington, DC

- Managed headquarters coordination, senior-leader support, task quality, strategic documents, and program-establishment work.

2002-2007

Environmental health and preventive medicine leadership

DeWitt Healthcare Network; 1st Brigade, 25th Infantry Division; CHPPM-Europe

- Directed healthcare environmental-health programs, deployed preventive medicine, and overseas water, wastewater, environmental-assessment, and compliance projects.

Academic Appointments and Teaching

2020-2023

Assistant Professor, Preventive Medicine and Biostatistics

Uniformed Services University

Directed and taught graduate environmental and occupational health courses, advised research, led a doctoral program, and contributed to accreditation and continuous improvement.

2019-2020

Teaching Fellow, Environmental Health Sciences

Columbia University Mailman School of Public Health

Supported graduate instruction in Environmental Determinants of Health II.

2011-2014

Instructor / Assistant Professor

United States Military Academy

Directed and taught Environmental Science and Environmental Biological Systems, developed curriculum and laboratories, mentored faculty and cadets, and supported ABET assessment.

Research and Selected Publications

Research interests include climate and health, occupational heat stress, environmental epidemiology, exposure assessment, environmental determinants of health, public-health surveillance, risk assessment, and applied prevention.
